

Ask the FCC

Federal Communications Commission

Are you getting too many illegal unwanted robocalls at all hours of the day and night?

Are you receiving scam calls?

Is your phone bill confusing and seemingly written in some other language?

How can you be sure not to lose your favorite television stations after the upcoming broadcast transition?

How do you make your voice heard regarding telecommunications and broadcasting issues?

FCC officials will be here to answer your questions and help solve these and other issues you may have on telecommunications and broadcast matters.

This is a great opportunity to meet with representatives from the FCC.
